

# Climate Change and Home Energy

7pm Wednesday 11<sup>th</sup> November 2009

[The Atrium, 4 Millbank, London SW1P 3XR](#)

Speakers will commence at 7:15pm.

Canapés and drinks served during the evening.

Places are limited. RSVP today to [events@alertme.com](mailto:events@alertme.com)

You are cordially invited to explore ways in which we can all act today to make our home energy consumption visible and get it under our control. Since 29% of UK national energy consumption occurs in the home this can have a quick – and significant – effect on climate change.

**Prof David MacKay FRS** Chief Scientist at DECC and author of “Sustainable Energy – without the Hot Air” will speak briefly about climate change and the alternative low-carbon pathways that remain open to us.

**Jens Redmer of Google** will speak about the importance of making energy consumption information available to consumers to allow them to manage their energy usage and reduce their carbon footprint.

The event will be hosted by Pilgrim Beart, CEO AlertMe.com Ltd.

Working in partnership with Google PowerMeter, AlertMe Energy empowers consumers to save money, save energy and reduce their carbon footprint.
